

ShipFund

**A Blockchain-Based, Oracle-Verified Invoice
Financing Platform for the Logistics Companies**

Group 9 | Overview Presentation

- 1. Problem**
- 2. Proposed Solution**
- 3. How Blockchain Works**
- 4. Business Model**
- 5. Financial Analysis**
- 6. Risks & Mitigation**
- 7. Conclusion**

Global logistic market

- Value at over \$10 trillion
- Backbone of global trade and e-commerce

Growing demand

- Cross-border trade expansion
- E-commerce growth
- Supply chain digitalization

Cash-intensive operations

- Fuel costs
- Driver wages
- Warehouse expenses

Financing challenges

- Long payment cycles
- Limited financing access for SMEs
- Expensive invoice financing options

**Working – Capital
Pressure**

Delayed B2B Payments
51-days average B2B collection
77 days in emerging markets
→ Cash-flow problems

(IBS Intelligence, n.d.)

**High Rejection Rates
for SMEs**

**SMEs often lack collateral and face high
rejection rates (41%)**
→ Limited access to traditional financing

(Asian Development Bank, 2026)

**Costly & Slow
Invoice Financing**

**High fees (2–5% invoice/month) + Slow
Verification + Fraud risk**
→ Takes days to weeks for manual verification

(Allianz Trade Corporate, n.d.)

➔ **Logistic SMEs need a faster, more transparent, and more accessible financing solution**

2. PROPOSED SOLUTION

Proposed Solution (1/2)

1 Completes
Delivery & Issues
Invoice

2 Upload Bill to
ShipFund
website

3 Oracle Verifies
Delivery & Bill
information

4 Receivable is
Tokenized

Proposed Solution (2/2)

5

Investor Fund

6

Receives Early
Payment

7

Customer Pays
at Maturity &
Investors Get
Paid

→ **Connects logistics companies that need early cash with investors who provide the funding**

3. HOW BLOCKCHAIN WORKS

4. BUSINESS MODEL

Target Customers

- Logistics SMEs with delayed payments, who needs cash for operation expenditures

Investor Profile

- Crypto-native retail investors, Web3 and institutional investors seeking RWA yield opportunities

Strategies

1. For logistics SMEs

- Industry partnerships → Logistics associations & B2B networks
- Direct outreach → LinkedIn + targeted B2B sales
- Industry events → Logistics conferences & trade events

2. For Investors

- RWA/Web3 communities → Introduce ShipFund to potential investors
- Fintech/Blockchain events → Network with potential investors
- Investor referrals → Leverage existing investor networks

Our Goals

20+ logistics
SME clients

\$60K+
ShipFund
Revenue

Value Proposition

- Direct Financing Access
- Oracle-Verified Receivables
- Tokenized Receivables
- Smart contracts for Automated Settlement

Revenue Model

Revenue Model

Competitors

Criteria	Banks, Financial Institutions	Polytrade	ShipFund
Service cost	0.5% – 2.5%	1.0% – 2.0%	1% total discount
Verification	Manual audit, collateral required	Third-party verification	Oracle verification
Processing	1-3 weeks	1-3 days	Under 24 hours

➔ **ShipFund combines automated verification with faster processing**

5. Financial Analysis

Financial Analysis (1/3)

\$4,000

Estimated
MVP Cost

Projected invoice volume (Y1)

➔ **Higher transaction volume means higher revenue**

Projected Revenue (Y1)

- Revenue M1 = $\$920,000 * 0.7\% = \$6,440 > \text{Initial MVP Cost}$

➡ **ShipFund generates positive monthly revenue with a low initial investment**

6. Risks & Mitigations

- **Oracle and Technical Risk:**
Smart contract bugs/ manipulated data
→ Deploy multi-source verification + audits + emergency pause
- **Legal & Regulatory Risk**
Unclear rules for tokenized receivables
→ Follow applicable digital-asset & electronic-invoice regulations
- **Fraud Risk**
Fake or duplicated invoices
→ IoT/API verification + unique on-chain invoice records

1. Wrap-up

- **Addresses Working-Capital Pressure**
Helps logistics SMEs access cash before invoice maturity
- **Blockchain-Enabled Financing**
Uses tokenization, oracle verification, and smart contracts to improve transparency and trust

3. Outlook

- **Next step:** Launch a small pilot with selected logistics SMEs and verified invoices
- **Goal:** Validate invoice demand, investor participation, and transaction process before scaling.

2. Limitations

- Regulatory Uncertainty
- Buyer default & fraud risk
- Need for sufficient investor liquidity
